Plant "Glads"  
for Happiness

DR. J. A. CLAUSEN  
WALNUT, ILLINOIS

1943 has been a critical year for gladiolus growers throughout the country. Help has been difficult to obtain. Fertilizer, spray materials, tools, containers and various supplies have been scarce and high priced. Costs of production have soared far above that of past seasons. It has been necessary to raise prices of bulbs somewhat but not to the extent that average costs of living have been increased.

We have again planted our bulbs on new ground and are proud to offer our customers a high quality of clean vigorous bulbs.

### **PLEASE READ BEFORE ORDERING**

Prices of bulbs and bulbets in retail list are shipped prepaid, those in "Quantity List" are priced F. O. B. Walnut, Illinois. Terms are cash in full with order. We cannot fill orders of less than \$1.00 without a loss, so if your order should total less than \$1.00, add 20c to help pay for packing and expense of handling the order.

### **CAUTION**

Don't risk sending silver or currency in payment of your order. If you do so it must be at your own risk. Last season several customers wrote me that they had sent for bulbs but had received no bulbs and no reply. In each case they had put cash in the envelope with order. So please send a bank draft, express money order or postoffice order.

### **DISCLAIMER**

We use every precaution possible to grow high quality stock and true to name. However, we will not hold ourselves responsible for crop grown, because the conditions of planting, tillage and general care are not within our control. However, if bulbs are unsatisfactory upon receipt, they may be returned for refund, and if on blooming they do not prove true to name we will replace with same or other variety of equal value.

We have discontinued some varieties that have appeared in previous catalogs but have added many of the more recent introductions of same color and superior qualities. These newer varieties will hold many pleasant surprises for you when you see them bloom.

## BULBLETS

We are not offering bulblets by "100", or "1,000", this year. We do not have time to count them. Instead, we offer them in  $\frac{1}{2}$  ounce or  $\frac{1}{2}$  pint, etc. The number of bulblets in a measured or weighed quantity varies a great deal but for average size bulblets  $\frac{1}{2}$  ounce will contain from 150 to 250, and  $\frac{1}{2}$  pint from 750 to 1,250 bulblets. A few of the rarer sorts are listed by tens.

When ordering, be sure to specify about when you wish bulbs to be shipped. If you wish your bulbs sent parcel post and want the parcel insured, send 10c extra for insurance fees.

## SPECIFY SECOND CHOICE

Our 1943 planting was one-third less than 1942, so our available surplus for sale is less than the past season. Orders are also coming in earlier than in previous seasons. We know we will not have enough bulbs to supply the demand; so please send your order early and also mention some varieties you are willing to accept as second choice. We reserve the right to send equal value in smaller size bulbs if we are out of size ordered.

## DISCOUNTS

We are not offering any specific discounts this year. We plan on giving overcount and extras in as liberal a manner as conditions permit, as our older customers are well aware of.

## OUR 1944 MIXTURE

We are not offering a low priced mixture this season. We figure that any variety not worth pricing separately is not good enough for a mixture. So the mixture we offer is made up of standard varieties as listed in catalogs of 1942-3-4, and contains many varieties and all colors.

## SIZES

Large bulbs contain No. 1 and No. 2 or  $1\frac{1}{4}$  inch and up.  
Medium bulbs contain No. 1 and No. 2 or  $\frac{3}{4}$  to  $1\frac{1}{4}$  inch.  
Small bulbs contain No. 5 and No. 6 or  $\frac{5}{8}$  to  $\frac{3}{4}$  inch.
